ANNEXURE A – Terms of Reference

Introduction

1. The Department of Planning, Monitoring and Evaluation (DPME) through the Branch: National Planning Coordination Services is undertaking the process of developing the NDP Five-Year Implementation Plan as a comprehensive strategy to select and prioritise national goals as reflected in the NDP 2030.

1.1. The achievement of the NDP goals requires cooperative relationship across national, provincial and local spheres of government need to collaborate to ensure alignment between their powers and function in order to create a spatially transformed country.

1.2 Social Housing/ human settlements has huge potential to have great impact on the restructuring and spatial transformation agenda, to incentivise private sector to invest and to enable secondary private investments in key urban nodes and improving the overall rental market within the country.

1.3 Spatial Transformation plays a key role in the growth and development for regions. The NDP explicitly acknowledges that for us to radically change the spatial face of the country we need to as a country do the following;

1.3.1 Clarify and relentlessly pursue a national vision for spatial development,

1.3.2 Sharpen the instruments for achieving this vision &

1.3.3 Build the required capabilities in the state and among citizens.

Purpose of project

2. The purpose of the project is to request for a service provider that will create 3D visual rendering / video / animation illustrating Spatial Transformation / change in South Africa between the period of 2019 and 2024 based on the plans and interventions stated in the five-year NDP Implementation Plan. The video needs to zoom into greater detail of specific developments and/or projects, with emphasis on infrastructure (including social infrastructure) and the built environment across the country.

Background

3.1 The apartheid system was based on racial segregation, control and deliberate dispossession and socioeconomic marginalisation of the black majority. The black majority were effectively removed from urban land and had no legal claim to land or property ownership rights outside of their 'homelands'. Housing for black families was created just outside the cities, and access of black labourers to the city was limited. The transport services provided were designed to control access to urban areas, with commuter flows that brought people over the long distances in the morning and took them home in the evening.

3.2 After the first democratic elections in 1994 the reality on the ground for many South Africans was displacement, marginalisation, inadequate shelter, tenure and asset insecurity, and poor access to the socioeconomic opportunities. Cities continue to be characterised by spatial fragmentation, socioeconomic exclusion and inequality.

Proposed methodology/ approach

4. The main attribute/s would be done by making use of Audio (voice overs and African background music); and Visual (CAD, GIS image overlays, animated images/visuals, video, architectural sketches, drone / aerial footage, visual rendering and graphics); for the period between 2019 and 2024 using different variables which should incorporate;

4.1. Expected Land-use/spatial transformation

4.1.1. This will assist in noting regions that have changed in land use over a period of time. These changes can include areas that change from a non-urban land use to an urban land use showing the difference in the built up areas (infrastructure and built environment).

4.2. Migration patterns

4.2.1. This will assist in establishing population movements to and from a region and show what the transformation will intend to create.

4.3. Population densities

4.3.1. This will assist in showing the change in densities of people in a region.

5. The visual rendering should look at;

5.1. Changes in Spatial elements which should include the national corridors and the national urban regions outlined in the NSDF and IUUF.

5.1.1. How these corridors will look and how they link supra-nationally.

5.2. Major public and private investments in infrastructure and economic development, in particular the PIC, SEZs and The Public Private Growth Initiative projects and their location on the map.

5.2.1. Where these projects are and the impact and job opportunities they will create.

5.2.2. Interventions included in the 5-year NDP Implementation plan. Interventions stated in the 5-year Implementation Plan and the impact they will have on South African Regions e.g. how will human settlements look in the next five years.

Envisaged Result

6. The envisioned outcome will be a visual rendering/visual representation for spatial transformation in South Africa based on the Five-Year NDP Implementation Plan for the period 2019-2024 as outlined above.

7. Audio and Visual Rendering Requirements

3D Visual Presentation of South Africa's landscape showing Spatial Transformation between 2019 and 2024. This must provide a visual representation of how the interventions of the five-year NDP Implementation Plan will look using realistic images in combination with animation, video simulation, CAD and Architectural sketches and related mechanism.

The rendering video should show a Capable South Africa that is working towards a self-sustaining, well-functioning and inclusive country where all citizens begin to see progress in their quality of life. The integration of different racial groups in different areas and of how people are living close to where they work is an example of what should be shown.

The final product will be:

- 1) a short video which is four to five minutes long.
- 2) a 10 page A3 bound booklet in high gloss and full colour, 150 copies with high-quality, as well as high-resolution .pdf that will allow for internal reproduction should that be required later on.

Examples of similar videos could be accessed: (<https://www.thesouthafrican.com/news/gauteng-30-new-cities-800000-households/>)

The project team will be required to demonstrate their abilities by submitting at least 3 examples of layout and design work, 3 examples of video projects of related scope / nature. The team may also submit other relevant examples.

8. Resources Required

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - (a) disregard the bid of any bidder if that bidder, or any of its directors have abused the institution’s supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - (b) cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
